0-25” H₂O to 0-100 psid
Piston & Diaphragm Sensors for Liquids or Gases

Features
- Small size
- Low cost
- Rugged
- OEM friendly design

We refer to these smaller versions of our differential pressure line as indicators. A 1-inch diameter dial with a simple red/green arc is standard to indicate normal operation and alarm conditions. The interface between the red and green portions of the arc is located at 70% of the full scale on standard models.

Made of a chemical and impact resistant clear molded plastic, the dial has a wide viewing angle. Popular where the graduated scales and higher accuracy of our full-size DP line are not necessary, they have ±5% accuracy and a low price to suit your budget.

Our 1002 series piston models are the lowest cost option for liquid applications. Though small, they are the favorites for OEM requirements and measure from 0-1 to 0-100 psid. Our 1020 series diaphragm models are more sensitive and measure from 0-25” H₂O to 0-30 psid.

We offer an optional SPST or SPDT, hermetically sealed reed switch, where an output is required. Our DP switch models, with no dial, are also popular.

A larger 2-inch dial with a graduated scale is available for higher resolution measurements. Also common are our optional green/yellow/red arcs. Or you can specify our level measurement arcs where the red alarm condition is at the lower end of the scale.

*5000 psig model available on request
**A DIN 43650C-PG7 with mating connector is optional, rated IP65

**How to Order**

Select from each of the applicable categories to construct a model number. Use the model number when ordering or obtaining additional information and pricing from Orange Research or your local distributor.

Reordering? You must supply the Part Number from your instrument label.

**Sample Model Number**

1002PIS – 1A – 1M – A 0-1 psid, V

---

**Model 1002PIS**

- **1A** = in-line ports
- **3A** = manifold back ports
- **4A** = 1/8” NPT back ports
- **5A** = 1/8” NPT bottom ports
- **15A** = 1/8” NPT bottom ports w/1/4” conduit port

- **1M** = 1” molded lens (std.)
- **2L** = 2” SS bezel

---

**Model 1020DI/DIS**

- **1A** = in-line ports
- **3A** = manifold back ports
- **4A** = 1/8” NPT back ports
- **5A** = 1/8” NPT bottom ports

- **2L** = 2” SS bezel

---

**Options**

- **A** = SPST, N.O.
- **B** = SPST, N.C.
- **C** = SPDT

---

**Breakpoint/Setpoint**

- 0-25” H2O; 0-1, 0-2, 0-3, 0-5, 0-8, 0-10, 0-15, 0-20, 0-25, 0-30, 0-35, 0-40, 0-50, 0-60, 0-80, 0-100 psid

---

**Special Seals**

- **V** = Viton
- **E** = EPDM
- **F** = Fluorosilicone

---

**Model 1002:** Special Seals (Buna-N standard):

- V = Viton

**Model 1020:** Special Diaphragm & Seals (Buna-N standard):

- E = EPDM
- F = Fluorosilicone
- V = Viton
